

Environmental policy

Enerco Group AB (including associated subsidiaries) shall work for preventive and sustainable environmental work. The basis and objective of our environmental work is to minimize the impact and to remain at the forefront in terms of development and innovation in the environmental area.

To reach our goal, Enerco will:

- Work on continuous improvements
- Follow applicable environmental legislation and other binding requirements
- Continuously follow up and evaluate our environmental impact
- Make the same demands on our suppliers and partners
- Raise awareness and knowledge of our employees in the environmental field
- Think long-term and sustainably at all stages through the application of the life-cycle perspective to prevent the environmental impact from being inadvertently moved to another part of the life-cycle.

This policy shall be continuously reviewed and revised if necessary.
